

JAMES CARTER

## PROFESSIONAL SUMMARY

Results-driven backend developer with 2 years of experience building scalable, secure, and maintainable web applications using Python and Django. Proficient in REST API design, database optimization, and version control with Git. Adept at translating business requirements into technical specifications and delivering high-quality software solutions on time.

## EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

Graduated: June 2020

## SKILLS

PYTHON, DJANGO, REST API DESIGN, POSTGRESQL, GIT, JSON, HTML, CSS, UNIX COMMAND LINE, UNIT TESTING, DATABASE MODELLING, API DOCUMENTATION, REQUIREMENTS GATHERING, VERSION CONTROL, CODE REVIEW, SOFTWARE DESIGN PATTERNS, DATABASE PERFORMANCE TUNING, API SECURITY, JSON SERIALIZERS, DATABASE MIGRATIONS, UNIT TEST CASES, DATABASE INDEXING, SOFTWARE DOCUMENTATION

## EXPERIENCE

SOFTWARE DEVELOPER

BLUE SKY TECHNOLOGIES

CHICAGO, IL

April 2022 - Present

- Designed and implemented RESTful APIs for a customer management system using Django and PostgreSQL, improving data retrieval times by 40% through optimized queries and indexing.
- Developed unit tests for core application features using Python's unittest framework, achieving 95% test coverage and reducing bug reports by 30%.
- Collaborated with front-end developers to ensure seamless integration between client and server-side components, resulting in a 25% improvement in overall system performance.
- Maintained and updated legacy codebase by refactoring redundant functions and improving code readability, reducing technical debt and improving maintainability.

JUNIOR SOFTWARE DEVELOPER

NORTHERN TECH SOLUTIONS

SEATTLE, WA

June 2020 - March 2022

- Built a custom authentication system using Django's built-in authentication framework, improving user security and reducing login-related support tickets by 50%.
- Implemented a database-driven logging system to track user activity, which was later used to generate detailed analytics reports for internal stakeholders.
- Assisted in the design and deployment of a Django-based internal tool for managing project timelines, resulting in a 35% increase in team productivity.
- Conducted code reviews and provided feedback to junior developers, helping to standardize best practices and improve code quality across the team.

## PROJECTS

### CUSTOMER SUPPORT PORTAL

Developed a full-stack Django application to streamline customer service workflows, integrating a PostgreSQL database for efficient data storage and retrieval. The project included a REST API for external integrations and a user-friendly interface for support agents, reducing average ticket resolution time by 20%.

### INVENTORY MANAGEMENT SYSTEM

Built a Django-based inventory management tool for a small retail chain, featuring real-time stock tracking, order processing, and report generation. The system improved inventory accuracy by 15% and reduced manual data entry errors.
