

DATA SCIENTIST

PROFESSIONAL SUMMARY

Results-driven data scientist with 3 years of experience leveraging Python, SQL, and classical machine learning to derive actionable insights from complex datasets. Skilled in data cleaning, exploratory data analysis, and building predictive models using regression and ensemble techniques. Adept at translating business problems into data-driven solutions and communicating findings to non-technical stakeholders.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

Graduated: 2018

SKILLS

PYTHON, PANDAS, NUMPY, SCIPY, SCIPY, SQL, PYTHON, PANDAS, NUMPY, SCIPY, SCIPY, SCIPY,

Figure 6-7: A visualization of word frequencies from the IMDb dataset. The words are arranged in rows, with each row containing 18 words. The frequency of each word is indicated by its size, with larger words representing higher frequency.

EXPERIENCE

DATA SCIENTIST

BLUE SKY ANALYTICS

CHICAGO, IL

April 2021 - Present

- Developed and deployed multiple regression models to predict customer churn, improving forecast accuracy by 18% over baseline models.
- Built a random forest classifier to detect fraudulent transactions, achieving a 92% precision rate and reducing false positives by 25%.
- Collaborated with cross-functional teams to integrate predictive models into existing business intelligence dashboards.
- Conducted exploratory data analysis on customer behavior data, leading to the identification of key drivers of customer satisfaction.

DATA ANALYST

TANGO INSIGHTS

SAN FRANCISCO, CA

June 2019 - March 2021

- Cleaned and processed over 2 million rows of transactional data using SQL and pandas, enabling accurate reporting for sales teams.
- Created visualizations and dashboards using Tableau to track key performance indicators for multiple client accounts.
- Built a logistic regression model to assess credit risk, supporting loan approval decisions for a financial services client.
- Conducted A/B testing on marketing campaigns, resulting in a 12% increase in conversion rates for one key

product line.

PROJECTS

CUSTOMER CHURN PREDICTION MODEL

- Built a multi-class logistic regression model using customer demographics and transaction data to predict churn.
- Evaluated model performance using precision, recall, and F1 score, and optimized hyperparameters to improve accuracy.

SALES FORECASTING TOOL

- Designed a Python-based tool that automates the generation of sales forecasts using time series analysis and historical data.
- Integrated the tool into a company-wide reporting system, reducing manual forecasting efforts by 40%.
