

DEBORAH L. CHEN
DEVELOPMENT OPERATIONS ENGINEER

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with three years of experience in designing, implementing, and maintaining scalable infrastructure and automated deployment pipelines. Skilled in Linux system administration, containerization, and continuous integration practices. Adept at improving system reliability and reducing deployment times through automation and process optimization.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE
UNIVERSITY OF NORTHWESTERN
GRADUATED 2019

SKILLS

DOCKER, LINUX (UBUNTU, CENTOS), BASH SCRIPTING, GITHUB ACTIONS, AWS EC2, AWS S3, JENKINS, MYSQL, HTTPD, LOGSTASH, ELK STACK, GIT, SSH, TCP/IP, SYSTEM MONITORING, PERFORMANCE TUNING

EXPERIENCE

SOFTWARE ENGINEERING DEVOPS SPECIALIST
BLUE SKY TECHNOLOGIES
JULY 2021 - PRESENT

- Designed and maintained CI/CD pipelines using GitHub Actions to automate testing and deployment for multiple microservices.
- Implemented containerized applications using Docker to improve deployment consistency and reduce environment configuration issues.
- Configured and managed AWS EC2 instances and S3 buckets to support scalable application hosting and data storage.
- Optimized Linux server performance through system tuning, log analysis, and resource monitoring using tools like Logstash and the ELK stack.

JUNIOR DEVOPS ENGINEER
TECHNOLOGY FUSION INC.
SEPTEMBER 2018 - JUNE 2021

- Developed bash scripts to automate routine system administration tasks, reducing manual effort by over 40%.
- Collaborated with development teams to integrate testing environments into the CI/CD pipeline, improving deployment efficiency.
- Set up and maintained web servers using Apache HTTPD, ensuring high availability and secure configurations.
- Assisted in the migration of legacy applications to a containerized architecture, resulting in faster deployment cycles and improved system reliability.

PROJECTS

CONTAINERIZED MICROSERVICE ARCHITECTURE

- Led the containerization of a legacy monolithic application into multiple microservices using Docker.
- Integrated Docker with GitHub Actions to automate testing and deployment, reducing deployment time by 35%.

AWS INFRASTRUCTURE AUTOMATION

- Built a scalable infrastructure using AWS EC2 and S3 to support a growing user base.
- Implemented automated backups and monitoring for critical application components using AWS tools.

CERTIFICATIONS

AWS CERTIFIED SOLUTIONS ARCHITECT - ASSOCIATE

OCTOBER 2022
