

Priya Nair  
Data Scientist

## SUMMARY

Data Scientist with 3 years of experience building classical ML models for business forecasting.

## EXPERIENCE

Data Scientist, Northgate Retail Analytics (2023 - Present)

- Built customer churn and demand-forecasting models in Python using pandas and scikit-learn (random forests, logistic regression).
- Explored a neural approach to the churn-prediction problem beyond the team's usual random forest baseline, achieving a modest accuracy improvement on held-out data.
- Wrote SQL queries against the data warehouse to build training datasets.

## SKILLS

Python, pandas, scikit-learn, SQL, classical ML models (regression, random forests)

## EDUCATION

MSc Data Science, University of Leeds (2020 - 2022)
