

Ryan Callahan  
DevOps Engineer

## SUMMARY

DevOps Engineer with 3 years of experience running CI/CD pipelines and Linux infrastructure.

## EXPERIENCE

DevOps Engineer, Fenwick Logistics (2023 - Present)

- Built and maintained CI/CD pipelines in GitHub Actions for the platform team.
- Helped migrate the team's Docker Compose based services to a more scalable, self-healing orchestration setup for production, reducing manual restarts after a crash.
- Administered the team's Linux servers and wrote bash automation scripts.
- Managed AWS EC2 instances and S3 buckets directly for hosting and storage.

## SKILLS

Docker, CI/CD pipelines (GitHub Actions), Linux administration, Bash scripting, AWS EC2 and S3

## EDUCATION

BSc Computer Science, Cardiff University (2019 - 2022)
